## SUMMARY

B.Tech CSE student passionate about building production-ready software and solving real-world problems. Looking to contribute to meaningful engineering work through an internship or full-time role.

## EDUCATION

**RCC Institute of Information Technology, Kolkata, India (MAKAUT)**

Aug 2023 – June 2027

Bachelor of Technology (B.Tech), Computer Science and Engineering , CGPA: 7.96/10

**Baradongal Ramanath Institution, Higher Secondary Education | 2023 | 84%**

**Baradongal Ramanath Institution, Secondary Education | 2021 | 88.42%**

## SKILLS

**Languages:** JavaScript, TypeScript, Java

**Frontend:** React, Vite, Tailwind CSS, Bootstrap, Zustand, Chakra UI

**Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO, EJS, Payment Integration (Razorpay)

**Databases:** MongoDB, MySQL, PostgreSQL, Firebase, Supabase

**CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, OS Concepts, SDLC, Agile Methodologies

**Tools & Cloud:** Git, GitHub, Docker, Zod, Postman, Vercel, Render, Linux, Cloudinary, AWS, Google Cloud Platform

## PROJECTS

**LiveTrack — Real-time Location Sharing System | [Live](#) | [GitHub](#)**

- Built a full-stack real-time location-sharing app using Node.js, Socket.IO, and MongoDB supporting room creation, live participant tracking, and **sub-500ms** updates for **80+ concurrent users**
- Integrated **DigiPin** geolocation encoding API with MapLibre GL for India-specific interactive mapping; implemented RESTful MVC architecture with zero location-sync errors under multi-room load testing
- Tech: React, Vite, Node.js, Express.js, Socket.IO, MongoDB, MapLibre GL

**Zipply — URL Shortener & QR Platform with Payments | [Live](#) | [GitHub](#)**

- Developed a full-stack SaaS platform with JWT auth, role-based access, and 3-tier subscription enforcement (**3–25 links/QRs per plan**), integrated Razorpay payment gateway and Brevo SMTP for transactional OTP emails
- Secured app using Helmet CSP, Express-Mongo-Sanitize, and bcrypt; added redirect analytics with user-agent tracking and auto-expiry fallback for paid plan downgrades
- Tech: Node.js, Express.js, MongoDB, EJS, JWT, Razorpay, Brevo API, bcryptjs, Helmet

**LatencyLens — REST API Performance Testing Tool | [Live](#) | [GitHub](#)**

- Built a developer tool for load testing any REST endpoint with support for GET, POST, PUT, DELETE, and PATCH across 1–100 requests
- Reports **P50, P95, P99 latency**, success rate, and stability score with JSON/CSV export; containerized with Docker
- Tech: Node.js, Express.js, Axios, Vanilla JS, Docker, Node perf\_hooks

## EXPERIENCE

**Full Stack Developer | Self-Initiated Projects**

Jan 2025 – Present

- Designed and deployed 3 production full-stack applications end-to-end, from system design through cloud deployment on Vercel and Render
- Contributed to a private bus booking application, implementing search, seat selection, and booking workflow using Node.js and MongoDB

## ACHIEVEMENTS

- Solved **200+** DSA problems across LeetCode and GeeksforGeeks; actively practising Data Structures & Algorithms
- Earned Google Cloud Arcade Champion badge (75 points, April 2025), gaining hands-on exposure to Cloud Computing and GCP fundamentals
- Completed JPMorgan Chase Software Engineering Job Simulation (Forage)
- Earned **NPTEL** certification in **Programming in Java (85%)**, validating strong OOP and core Java fundamentals
