SUMMARY

Computer Science undergraduate with hands-on experience building and deploying full-stack web and Android applications using React, Node.js, and Java. Built applications featuring secure authentication, payment integration, caching, and integrated GenAI APIs – including a live production website for a manufacturing client.

EDUCATION

RCC Institute of Information Technology (MAKAUT) <i>Bachelor of Technology in Computer Science and Engineering – CGPA: 8.03/10</i>	Kolkata, India 2023 – 2027
Baradongal Ramanath Institution <i>Higher Secondary Education (Science) – 84%</i>	2023
<i>Secondary Education (Class X) – 88.42%</i>	2021

SKILLS

Languages: Java, JavaScript, SQL
Frameworks: React, Node.js, Express.js
Databases: MongoDB, MySQL, Redis
Tools & Cloud: Git, GitHub, Postman, Vercel, Render
AI Tools: LLMs, Google Gemini API, Prompt Engineering
Core Subjects: DSA, DBMS, Object-Oriented Programming, Operating Systems

PROJECTS

Zippy — URL Shortener & QR Platform • GitHub Live Demo • Built a full-stack platform that allows users to shorten URLs, create QR codes, manage links, and track clicks. • Implemented user authentication, custom short links, link expiration, click analytics, and integrated Gemini AI to automatically generate short summaries and categories for links. • Used Redis for caching frequently accessed URLs and rate limiting, reducing redirect response time from 450–600ms to 100–150ms. • Integrated Razorpay subscription plans with different daily limits for URL and QR code generation.	<i>Node.js, Express, EJS, MongoDB, Redis, Gemini API</i>
ReSolve — DSA Mistake & Revision Tracker • GitHub APK • Built a personal Android app to record DSA problems, track mistakes, and organize problems for regular revision. • Implemented a revision system that schedules problems for review after 1, 3, or 7 days based on the user's performance. • Added a mastery system that marks a problem as mastered after 3 consecutive “Easy” reviews, along with review history tracking. • Used the Room Persistence Library to store problems and revision history, with search and filters for quickly finding problems by topic, platform, and status.	<i>Java, Android, XML, Room (SQLite)</i>

EXPERIENCE

Freelance Front-End Developer <i>Remote</i> • GitHub Live Demo • Developed a responsive business website for a local oil manufacturing company using React, JavaScript, and CSS. • Built a product catalogue for 10+ products with product details, filtering, and direct WhatsApp enquiry and call options. • Deployed the website on Vercel with Google Maps, WhatsApp, and click-to-call features for customer enquiries.	May 2026 – Aug 2026
--	---------------------

ACHIEVEMENTS & CERTIFICATIONS

Solved 300+ Data Structures & Algorithms problems on LeetCode
Certified in Java Programming (Elite – 85%) by NPTEL, IIT Kharagpur
